Journal of Non-Crystalline Solids 156–158 (1993) vii–xvii
North-Holland

Contents

Contents Parts I and II vii

PART I

Section 1. Static and dynamical structure

Static and dynamic structure of liquids and glasses (*Invited paper*)
P.A. Egelstaff 1

Structure and dynamics of expanded liquid alkali metals (*Invited paper*)
R. Winter, C. Pilgrim, F. Hensel, C. Morkel and W. Gläser 9

Dynamic properties of liquid metals (*Invited paper*)
G. Kahl, S. Kambayashi and G. Nowotny 15

Structure of binary metallic glasses (*Invited paper*)
S. Steeb and P. Lamparter 24

Structure of liquid caesium–lead alloys
D.L. Price, M.-L. Saboungi, G.A. de Wijs and W. van der Lugt 34

Neutron diffraction study of the structure of liquid Pb–Pd alloys
C.N.J. Wagner and M.S. Boldrick 38

Liquid alkali metals: microscopic dynamics and transport coefficients
U. Balucani, A. Torcini and R. Vallauri 43

Collective modes at very short wavelengths in liquid lithium
P.H.K. de Jong, P. Verkerk and L.A. de Graaf 48

Collective excitations in amorphous $Fe_{85}B_{15}$
M. Calvo, U. Dahlborg, C. Svensson Huldt, M. Arai, A.D. Taylor, W.S. Howells and R.G. Delaplane 53

The medium- and short-range collective atomic motion in Pd–Si(Ge) amorphous alloys
K. Suzuki, K. Shibata and H. Mizuseki 58

Bond-orientational correlation in liquids and glasses
T. Egami, T. Tomida, D. Kulp and V. Vitek 63

Structure of liquid group V and VI elements: a tight binding computer simulation
C. Bichara, A. Pellegatti and J.-P. Gaspard 68

Structure and dynamics of amorphous Zr–Be alloys
A.M. Bratkovsky, S.L. Isakov, S.N. Ishmaev, I.P. Sadikov, A.V. Smirnov, G.F. Syrykh, M.N. Hlopkin and N.A. Chernoplekov 72

Neutron diffraction study of liquid Bi–Se alloys
F. Kakinuma, T. Fukunaga, M. Misawa and K. Suzuki 76

Molecular dynamics study of static and dynamical properties of supercooled soft-sphere fluids
S. Kambayashi and Y. Hiwatari 80

Structure of liquid alloys in the MHNC approximation
H. Mori, K. Hoshino and M. Watabe 85

0022-3093/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

Three-dimensional characterization of models representing the structure of liquid and amorphous alloys
M. Calvo, F. Montoya and M. Dzugutov 89
Modeling of medium-range order in metallic glasses: calculation of X-ray scattering in a $Ti_{61}Cu_{16}Ni_{23}$ glass
L. Červinka 94
The nature of interatomic interactions in liquid metals from small-angle $S(Q)$ data
M. Davidovic, U. Dahlborg, I. Ebbsjo and W.S. Howells 98
Three-body distribution function in liquids: the case of liquid gallium
A. Di Cicco and A. Filipponi 102
Triplet correlation functions in liquid metals
B. Bildstein and G. Kahl 107
XAS investigation of three-body correlations in liquid Hg
L. Ottaviano, A. Filipponi, A. Di Cicco, S. Santucci and P. Picozzi 112
Neutron diffraction and neutron small angle scattering study of the amorphisation reaction in $Ni_{50}Mo_{50}$
L. Meiya, S. Enzo, I. Soletta, N. Cowlam and G. Cocco 116
Chemical short-range order in $(Ti_{76}Ni_{24})_x(Ti_{70}Cu_{30})_{1-x}$ neutron zero scattering amorphous alloys
T. Fukunaga, K. Okasaka and U. Mizutani 120
Comparison of the results of mode-coupling theory for liquid lead at 623 K and 1170 K with molecular dynamics data
W. Gudowski, M. Dzugutov and K.-E. Larsson 125
The structure of molten bismuth–lead alloys
W. Gudowski, A. Mellergård, M. Dzugutov, W.S. Howells and P. Zetterström 130
XANES and EXAFS investigation of sd hybrid bonds in alloys of gold with gallium, germanium and tin through the solid–liquid transition
B.R. Orton, C.M. Stanton, N.A. Gulley, D.A. Vorsatz and R. Manaila-Devenyi 133
X-ray absorption fine structure of the model amorphous and crystalline Ni_2B alloy
A.M. Bratkovsky and A.V. Smirnov 137
Diffusive motion and structural correlations in condensed systems
S. Baer 141
Liquid structure of the 3d transition metals
G.M. Bhuiyan, J.L. Bretonnet and M. Silbert 145
Integral equation study of the structure of expanded liquid rubidium and caesium
N. Jakse and J.L. Bretonnet 149
Structure and thermodynamic properties of liquid Bi–Ga alloys with miscibility gap
M. Inui and S. Takeda 153
Structural study on proposed phase transition of liquid tellurium under high pressure
K. Yaoita, K. Tsuji, Y. Katayama, N. Koyama, T. Kikegawa and O. Shimomura 157
Short-range order in Co–Er–B metallic glasses
B. Bouchet-Fabre, A. Kebab and J. Dixmier 161
Short range order in amorphous $Ni_{50}Ta_{50}$ alloys by means of X-ray and neutron diffraction
H. Uhlig, L. Rohr, H.-J. Güntherodt, P. Fischer, P. Lamparter and S. Steeb 165
Atomic structure of melt-spun amorphous $Ni_{56}Dy_{44}$ studied by neutron diffraction
M. Nuding, P. Lamparter, S. Steeb and R. Bellissent 169
Monatomic model of icosahedrally ordered metallic glass formers
M. Dzugutov 173

Neutron diffraction study of a Ni–42.2 at.% Zr alloy made by the multilayer amorphisation reaction and of Ni–42.2 at.% Zr metallic alloy glass
A. Zarbakhsh, N. Cowlam, P. Convert, R.J. Highmore and R.E. Somekh 177

Short range structure of amorphous electrodeposited $Cr_{80}C_{10}H_{10}$ and $Cr_{73}C_{12}H_{15}$ alloys by means of X-ray and neutron diffraction
M. Nuding, P. Lamparter and S. Steeb 181

Short range order in amorphous $Zn_{41}Sb_{59}$ obtained by thermopressure processing
V.A. Alekseev, O.I. Barkalov, S.L. Isakov, S.N. Ishmaev, E.G. Ponyatovsky and I.P. Sadikov . . 185

Theoretical analysis of stress changes during structural relaxation experiments for $Fe_{85-x}Co_xB_{15}$ glasses
J.M. Fiorani, A. Aharoune, F.A. Kuhnast and C. Cunat 188

Mössbauer effect studies of amorphous Al–Y–Ni–Fe alloys
R.A. Dunlap, M.H. Yewondwossen and D.W. Lawther 192

High-resolution electron microscope observation of medium-range atomic ordering in amorphous alloy
K. Anazawa, Y. Hirotsu and Y. Ichinose 196

Influence of the magnetic field on the structure of a liquid two-component magnet
I. Vakarchuk and I. Margolytch 201

Suppression of diffusion in the Lorentz gas
R. Bongratz and C. Morkel 205

Section 2. Electronic structure and magnetic properties

Structural, electronic, and magnetic properties of metallic glasses (*Invited paper*)
C. Hausleitner and I. Turek 210

Surface core level shifts in liquid metals and alloys (*Invited paper*)
P. Oelhafen, M. Dürrwächter, G. Indlekofer and H.-G. Boyen 219

The electronic structure of liquid heavy alkali metals from electron spectroscopy
G. Indlekofer and P. Oelhafen 226

Integral-equation approach to the electronic density of states in disordered materials
C.F. Strnadl and G. Kahl 232

Interplay of the atomic and electronic structure in liquid and amorphous Al–Ge alloys
R. Gampp, F. Baumann, H.-G. Boyen, A. Cossy-Favre, G. Gantner, P. Oelhafen and P. Häussler 236

Core level binding energy shifts in liquid binary alloys: Au–Ga
M. Dürrwächter, G. Indlekofer, H.-G. Boyen, P. Oelhafen and D. Quitmann 241

Electronic structure of amorphous Fe–Zr alloys
A. Cossy-Favre, H.-G. Boyen, P. Oelhafen, I. Turek and J. Hafner 246

The density of states for transition metals described by a new type of pseudopotential
N.A. Bruce and G.J. Morgan 251

Recursion-TB-LMTO calculations of the electronic structure of amorphous Ni–B, Fe–B and Zr–Be
A.M. Bratkovsky and A.V. Smirnov 255

Synchrotron radiation study on amorphous Au–Sb and Au–Sn
H.-G. Boyen, G. Indlekofer, R. Gampp, A. Cossy-Favre, P. Oelhafen, A. Taleb and F. Baumann 259

Core level shifts in amorphous transition metaltin alloys
H.-G. Boyen, G. Indlekofer, P. Oelhafen, M. Dürrwächter, P. Häussler and F. Baumann 263

Ab initio atomic and electronic structure calculations of selenium systems in different dimensions
T. Yamaguchi and F. Yonezawa 268
The influence of d-resonance splitting on the electronic density of states of topologically disordered transition metals
H. Solbrig, R. Arnold and M. Schubert 272
Trends in binary and ternary noble-metal–germanium alloys
C. Paulick, D. Quitmann, S. Saadeddine, M. El Bakkali, J.-G. Gasser and C. Regnault 276
Electronic properties of liquid mercury alloys
T. Itami, T. Kusakabe and Y. Yasuhara 281
Electronic properties of liquid alkali–thallium alloys
T. Itami, K. Izumi and N. Iwaoka 285
Compound formation in liquid alkali–indium alloys
R. Xu and W. van der Lugt 289
The electrical resistivities of liquid K–Sn and Cs–Sn alloys
R. Xu, T. de Jonge and W. van der Lugt 293
Electronic structure and electron transport properties of amorphous Mg–Ni–La and Mg–Cu–Y alloys
U. Mizutani, K. Tanaka, T. Matsuda, N. Suzuki, T. Fukunaga, Y. Ozaki, Y. Yamada and K. Nakayama 297
Electronic and atomic structure of $Al_xLa_{70-x}Ni_{30}$ amorphous alloys
I. Yamamoto, J. Van Zytveld and H. Endo 302
The Hall coefficient in disordered alloys of early and late transition metals
J. Ivkov and E. Babić 307
Local spin–density theory of magnetism in amorphous Fe–B alloys
M. Tegze, J. Hafner and C. Hausleitner 311
Domain wall dynamics and short-range order in ferromagnetic amorphous ribbons
R. Valenzuela and J.T.S. Irvine 315
Magnetic behaviour and hyperfine interactions in Al–Fe–Ce metallic glasses
Z.M. Stadnik, F. Müller, G. Stroink and M. Rosenberg 319
Magnetic and electrical study of amorphous metallic alloys Co–B–V and Co–B–Ti
K. Pękała, M. Pękała, U. Mizutani and P. Jaśkiewicz 324
A heavy fermion-type behavior of Ce-based amorphous alloys
K. Suzuki, K. Sumiyama, Y. Homma, H. Amano and T. Hihara 328
Liquid and amorphous metals as isotropic 3D Peierls systems
P. Häussler 332
Magnetic disorder in amorphous Fe-rich Fe–Zr alloys
D. Kaptás, T. Kemény, L.F. Kiss, L. Gránásy, J. Balogh and I. Vincze 336
Magnetic after-effect and surface domain structure in the amorphous alloy $Fe_{40}Ni_{40}P_{14}B_6$
D. Martínez, J. Rivas and F. Walz 340
Physical properties of amorphous Al–Gd–transition metal alloys
R.A. Dunlap, D.W. Lawther, M.E. McHenry, V. Srinivas and G. Beydaghyan 344
Effects of disorder on the superconducting T_c in amorphous Zr–Cu alloys
A. Nordström, Ö. Rapp and U. Dahlborg 347
The influence of localization and electron–electron interaction on the superconducting transition temperature in hydrogen-doped Zr–(3d,4d) metallic glasses
I. Kokanović, B. Leontić and J. Lukatela 352

Section 3. Thermodynamics

Liquid tellurides: structure and properties (*Invited paper*)
M.-L. Saboungi, J. Fortner, J.W. Richardson, A. Petric, M. Doyle and J.E. Enderby 356

Thermodynamic properties of liquid alloys of group IIB and VA elements (*Invited paper*)
A. Mikula 362

Sn–Zn system. Correlation between thermodynamic properties, physical properties, structure and phase diagram
Z. Moser and M. Kucharski 369

Investigations of thermophysical properties of liquid metals with a rapid resistive heating technique
G. Pottlacher, E. Kaschnitz and H. Jäger 374

Chemical interaction in the liquid (Co + Ga), (Co + In), (Ni + Ga), and (Ni + In) systems
E. Hayer, K.L. Komarek, M. Gaune-Escard and J.P. Bros 379

Partial thermodynamic properties of magnesium in ternary liquid Cu–Mg–Ni alloys
T. Gnanasekaran and H. Ipser 384

Mixing enthalpy of liquid Fe–Co–Ti alloys
H. Wang, R. Lück and B. Predel 388

Measurement of activity of gallium in Ga–Sb–In alloys by emf method using zirconia as solid electrolyte
I. Katayama, J.-i. Nakayama, T. Ikura, T. Tanaka, Z. Kozuka and T. Iida 393

Measurement of the enthalpy and specific heat of undercooled nickel and iron melts
M. Barth, F. Joo, B. Wei and D.M. Herlach 398

Thermodynamic properties of liquid and amorphous monatomic metals from an interstitialcy model
A.V. Granato 402

Concentration fluctuations and thermodynamic properties of demixing liquid binary alloys
R.N. Singh, S.K. Yu and F. Sommer 407

Thermodynamic self-consistency in the variational thermodynamic calculation for liquid metals
S.K. Lai and T.C. Huang 412

Temperature dependence of density and thermal expansion in some liquid metals
M. Kumari and N. Dass 417

Specific heat measurements by non-contact calorimetry
R.K. Wunderlich and H.-J. Fecht 421

Thermodynamics of liquid ternary $Fe_xNi_xCo_{1-2x}$ alloys by computer-aided Knudsen cell mass spectrometry
J. Tomiska, M.S. Belegratis, K. Kopecky and A. Neckel 425

The combination of a simple monopol mass spectrometer with a Knudsen cell for thermodynamic investigations at high temperatures
J. Vrestal and J. Tomiska 429

Thermodynamics of the structural changes in the liquid Zn–Sb system
Y. Tsuchiya and S. Kanai 433

Some correlations observed for diffusion in amorphous $Ti_{60}Ni_{40}$ and $Fe_{40}Ni_{40}B_{20}$ alloys
S.K. Sharma, M.-P. Macht and V. Naundorf 437

Viscosity measurements for liquid Al–Ni–La and Al–Ni–Mm (Mm: Mischmetal) alloys by an oscillating crucible method
T. Yamasaki, S. Kanatani, Y. Ogino and A. Inoue 441

Thermal-induced chemical short-range ordering in amorphous $Co_{80-x}Cr_xB_{20}$ alloys
O. Haruyama and N. Asahi 445

Undercooling investigations and heat capacity measurements on Pd–Ni–P melts
R. Willnecker, K. Wittmann and G.P. Görler 450
Thermal equilibrium properties of the electron fluid
J.P. Hernandez, E. Chacón and G. Navascués 455
Concentration fluctuations at the liquid–vapour coexistence in Ne–Ar mixture
S.M. Osman and R.N. Singh 459

Author index Parts I and II xxi
Subject index Parts I and II xxxiii

PART II

Section 4. Freezing and glass transition, amorphization and crystallization

Solidification of highly supercooled liquid metals and alloys (*Invited paper*)
J.H. Perepezko 463
Glass-forming ability of alloys (*Invited paper*)
A. Inoue, T. Zhang and T. Masumoto 473
The crystal to glass transformation in relation to melting (*Invited paper*)
W.L. Johnson, M. Li and C.E. Krill III 481
Thermopower of pure metals near the melting point as a parameter needed to control the solidification process
J. Vinckel, N. Benazzi, H. Halim, J.-G. Gasser, J. Comera and P. Contamin 493
Analytical field ion microscopy of the early stages of the solid state amorphization reaction in vapour-deposited Zr/Co double layers
S. Schneider, R. Busch, W. Bolse and K. Samwer 498
Concentration dependence of the Debye temperature in extended solid solutions near the crystal-to-glass transition
C. Ettl and K. Samwer 502
Static mean-square displacement as an indicator of the crystal-to-amorphous transformation
C.E. Krill III, J. Li, C. Ettl, K. Samwer, W.B. Yelon and W.L. Johnson 506
Stress criteria for solid state amorphization
D.T. Kulp, T. Egami, D.E. Luzzi and V. Vitek 510
Quantitative analysis of the classical nucleation theory on glass-forming alloys
L. Gránásy 514
The glass transition for as-quenched and pre-annealed amorphous $Pd_{40}Ni_{40}P_{20}$, measured and explained
P. Tuinstra, P.A. Duine and J. Sietsma 519
A modelization of the specific heat in the glass transition range for glassy alloys
A. Aharoune, F.A. Kuhnast and C. Cunat 523
Structural and thermodynamic aspects of glass formation in Cu–Ti–H: role of hydrogen in mechanical alloying
M. Baricco, L. Battezzati, G. Cocco, I. Soletta and S. Enzo 527
Structural simulation of an amorphisation reaction
J.-C. Li, N. Cowlam and J.E. Evetts 532
Dislocation loop driven phase transition in three dimensions, bulk melting and overheated solids
F. Lund 536

Amorphization from quenched high-pressure phase in tetrahedrally bonded materials
K. Tsuji, Y. Katayama, N. Koyama, Y. Yamamoto, J.-Q. Chen and M. Imai 540
Solid state amorphization of the GaSb high pressure phase
O.I. Barkalov, E.G. Ponyatovsky and V.E. Antonov 544
Characterization of ultra-fine amorphous particles prepared by chemical reduction
J. Saida, M. Ghafari, A. Inoue and T. Masumoto 547
Rapid solidification of microemulsions of liquid alloys in molten salts
H. Tostmann and W. Freyland 551
EXAFS study of the liquid–glass transition in binary nitrate systems
M. Yao, Y. Kawakita, K. Nagaya, Y. Ohmasa, T. Tsuzuki, M. Inui and H. Endo 555
Dynamical singularity of the glass transition in molten lithium iodide
S. Itoh, Y. Hiwatari and H. Miyagawa 559
Lattice instability in aluminum–silicon solid solutions
J. Chevrier, J.-B. Suck and J.C. Lasjaunias 564
Nb-driven nanocrystallization of amorphous $Fe_{75.5}Cu_1Nb_3Si_{12.5}B_8$
F. van Bouwelen, J. Sietsma and A. van den Beukel 567
Studying crystallization of amorphous metal alloys by time-resolved EXAFS
F. D'Acapito, F. Boscherini, F. Buffa, G. Vlaic, G. Paschina and S. Mobilio 571
EXAFS study on crystallization of mechanically prepared Cu–Ti amorphous alloy
K. Nakamura and M. Nagumo 575
Crystallization kinetics and glass formation in undercooled Fe–Ni–P–B alloy melts
A. Diefenbach, F. Gillessen, D.M. Herlach and G. Dietz 580
Electrical-resistivity evolution in $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$ during the amorphous-to-nanocrystalline transformation
P. Allia, M. Baricco, P. Tiberto and F. Vinai 585
Thermodynamics of the transition from the amorphous to the nanocrystalline state
K. Lu, R. Lück and B. Predel 589
Amorphization reactions and glass to crystal transformations in metallic materials
A. Serebryakov 594
Reductilization of embrittled La–Al–Ni amorphous alloys by viscous flow deformation in a supercooled liquid region
A. Inoue, T. Zhang and T. Masumoto 598
Free energy diagram and spontaneous vitrification of an ion mixed metastable hexagonal phase in the Ni–Mo system
B.X. Liu, Z.J. Zhang and H.Y. Bai 603
Amorphization of the intermetallic compound V_2Zr by ball milling
U. Herr and K. Samwer 608
Stability and elastic properties of amorphous Al–Zr–O films
A.D. Stricker, M. Faller, A. Bächli and A. Blatter 612
Mechanical alloying by the rubbing process
M. Hasegawa, T. Usami and S. Asai 617

Section 5. Metal–non-metal transition: expanded liquid metals

The metal–insulator transition: complexity in a simple system (*Invited paper*)
N.W. Ashcroft 621
Investigations of metals in the liquid and plasma states by use of shock waves (*Invited paper*)
A.V. Bushman, V.E. Fortov and I.V. Lomonosov 631

Interplay between disorder and electron interactions: mean-field phase diagram of an Anderson–Hubbard model (*Invited paper*)
D.E. Logan and M.A. Tusch 639
Structural studies of expanded fluid mercury
K. Tamura and S. Hosokawa 646
X-ray diffraction measurements for expanded liquid gallium
K. Tamura and S. Hosokawa 650
Electrical conductivity and thermopower of Cs liquid and dense vapour
H. Reinholz and R. Redmer 654
The adiabatic thermal pressure coefficient of expanded liquid alkali metals
V.A. Alekseev, L.A. Blagonravov, F. Modkhen and I.V. Samorodskaja 659
Experimental determination of the depolarized interaction-induced light scattering spectrum of mercury vapour at $T = 793$ K
F. Barocchi, M. Sampoli, F. Hensel, J. Rathenow and R. Winter 663

Section 6. Metal–non-metal transition: liquid semiconductors and metal–salt mixtures

Structural and electronic properties of liquid tellurium (*Invited paper*)
H. Endo 667
Liquid metal–semiconductor transitions (*Invited paper*)
A.C. Barnes 675
Electron–ion correlation in liquid tellurium
S. Takeda, M. Inui, S. Tamaki, K. Maruyama and Y. Waseda 683
Density of liquid tellurium under high pressure
Y. Katayama, K. Tsuji, J.-Q. Chen, N. Koyama, T. Kikegawa, K. Yaoita and O. Shimomura . . . 687
Specific heat of liquid S–Te mixtures
F. Kakinuma, S. Ohno and K. Suzuki 691
Structure of chalcogen nano-droplets
T. Tsuzuki, A. Sano, Y. Kawakita, Y. Ohmasa, M. Yao, H. Endo, M. Inui and M. Misawa 695
Sound velocity in the liquid Tl–Se system
Y. Tsuchiya 700
AC calorimetry of the thermodynamic transition in liquid $Ge_{15}Te_{85}$
Y. Tsuchiya 704
Density measurements for liquid Se–Te mixtures at high temperatures and pressures
S. Hosokawa, S. Yamada and K. Tamura 708
EXAFS studies of liquid As_2Te_3 and $GeTe_2$
S. Hosokawa, K. Tamura, M. Inui and H. Endo 712
Structures of molten Tl– and Bi–chalcogen systems
T. Usuki, Y. Shirakawa, K. Maruyama and S. Tamaki 716
Structure of fast-ion conducting chalcogenide glasses: the Ag–As–Se system
C.J. Benmore and P.S. Salmon 720
Short-range structure of As–S–I system
Y. Kameda, Y. Sugawara and O. Uemura 725
The optical properties of fluid iodine
I. Yamamoto, A. Tanaka and H. Endo 728
The optical properties of liquid chalcogens
H. Ikemoto, I. Yamamoto and H. Endo 732
Electronic properties of liquid MgSb
D.M. Verbrugge and J.B. Van Zytveld 736

Resistivity of liquid Sr–Bi and Sr–Sb alloys
R. Xu and W. van der Lugt 740
Electronic properties of the liquid In–As_2Te_3 system
O. Uemura, Y. Sugawara, Y. Kameda and Y. Nishimiya 744
Electrical properties of liquid In–Se alloys
T. Okada and S. Ohno 748
Electronic and ionic conductions in molten Tl–chalcogen systems
T. Usuki, K. Maruyama and S. Tamaki 752
Modification of the chain structure of liquid chalcogen by adding halogens and alkalis
Y. Kawakita, J. Dong, T. Tsuzuki, Y. Ohmasa, M. Yao, H. Endo, H. Hoshino and M. Inui 756
Metal–semiconductor transition in bulk amorphous Zn–Sb alloy under high pressure
O.I. Barkalov 760
Spectroellipsometric study of electron localization approaching the NM–M-transition in fluid K–KCl-solutions
R. Juchem, D. Nattland and W. Freyland 763
Structural and magnetic studies on binary mixtures of molten noble metal halides
Y. Shirakawa, M. Saito, K. Maruyama and S. Tamaki 767
An application of Thomas–Fermi molecular dynamics to metal–salt solutions
A. Meroni, J.-P. Hansen and P.A. Madden 771
Collective dynamics of ions in metal–salt solutions
F. Yoshida 775
Ultrasonic velocity and sound attenuation in molten cuprous halide mixtures
M. Inui and S. Takeda 779
Clustering in the $LiNbO_3$ melt
P. Andonov, S. Kimura and T. Sawada 783

Section 7. Clusters

Metallic character of small metal aggregates as a function of their atomic structure (*Invited paper*)
M. Broyer 787
Electronic structures and properties of microclusters: cadmium and mercury (*Invited paper*)
K. Rademann 794
NMR study of sodium dispersed in zeolites
G. Schäfer, W.W. Warren Jr., P. Anderson and P.P. Edwards 803
Cluster formation in expanded fluid mercury and dilute amalgams near the liquid–gas critical point
M. Yao, K. Takehana and H. Endo 807

Section 8. Surfaces

The study of liquid surfaces by neutron reflectometry
J.A. Hunt and N. Cowlam 812
Surface core level shift for liquid and solid gallium
M. Dürrwächter, G. Indlekofer, H.-G. Boyen, P. Oelhafen and D. Quitmann 817
The structure and surface tension of the liquid–vapour interface of simple metals
M.A. Gómez and E. Chacón 822
Density profile of liquid metal surface within the square-gradient approximation: density-functional approach
M. Iwamatsu 826

Surface tension and viscosity of liquid metals
I. Egry, G. Lohöfer and S. Sauerland 830
Surface tension measurements on levitated liquid metal drops
S. Sauerland, G. Lohöfer and I. Egry 833
Surface layer characterization of $Ni_{68}P_{18}Cr_{14}$ and $Ni_{64}P_{20}Fe_{16}$ amorphous alloys
H.G. Jiang, J.T. Wang and B.Z. Ding 837
The surface tension and composition of liquid Fe–P alloys
X.M. Xue and J.T. Wang 841
Software package for determination of surface tension of liquid metals
A.S. Krylov, A.V. Vvedensky, A.M. Katsnelson and A.E. Tugovikov 845
Critical percolation thickness of deposited metal films
M. Nakamura 849

Section 9. Quasicrystals

The structure of quasicrystals (*Invited paper*)
C. Janot 852
Electronic structures and transport properties in quasicrystals (*Invited paper*)
T. Fujiwara 865
Dynamical properties of stable icosahedral alloys (*Invited paper*)
J.-B. Suck 872
Electronic structure and electron transport properties of quasicrystals and approximant crystals in Al–TM and Mg–Ga–Al–Zn alloy systems
U. Mizutani, T. Matsuda, Y. Itoh, K. Tanaka, H. Domae, T. Mizuno, S. Murasaki, Y. Miyoshi, K. Hashimoto and Y. Yamada 882
Elementary excitations in quasicrystals
M. Krajčí and J. Hafner 887
Synchrotron-radiation study of valence bands in icosahedral $Al_{65}Cu_{20}Fe_{15}$ and crystalline Al_7Cu_2Fe
Z.M. Stadnik and G. Stroink 891
Valence and conduction band density of states in quasicrystals
E. Belin, Z. Dankhazi and A. Sadoc 896
Electronic properties of stable quasicrystals: towards a semiconducting quasicrystal?
T. Klein, C. Berger, G. Fourcaudot, J.C. Grieco, P. Lanco and F. Cyrot-Lackmann 901
Magnetism and local structure in quasicrystalline $Al_{86}Mn_{14}$
K. Matho and J.C. Lasjaunias 905
Physical properties of icosahedral $Al_{86}Cr_8Fe_6$
Z.M. Stadnik, F. Müller, F. Goldberg, M. Rosenberg and G. Stroink 909
Formation of quasicrystals and approximant crystals by mechanical alloying in Mg–Al–Zn alloy system
T. Takeuchi, S. Murasaki, A. Matsumuro and U. Mizutani 914
Neutron scattering study of quasicrystal-forming liquid alloys: $Al_{71}Pd_{19}M_{10}$ ($M = Mn_y(FeCr)_{1-y}$)
M. Maret, J.M. Dubois and P. Chieux 918
Activation energies for crystallization of Al_4Mn and $Al_4(Cr_{0.5}Fe_{0.5})$ quasicrystals
J. Wolny, R. Kokoszka and J. Sołtys 923
A comparison between quasicrystalline $Al_{65}Cu_{20}Fe_{15}$ alloys obtained by liquid solidification and mechanical alloying
N. Asahi, T. Maki, T. Kishida and K. Tatsugawa 927

Structure of icosahedral Al–Cu–Li(Mg) alloys: modulated tiling model
M. Windisch, M. Krajci and J. Hafner 927
Tiling of canonical cells: AlMnSi quasicrystal model
M. Mihalkovič and P. Mrafko 936
Phasons in chemically ordered quasicrystals
R. Lück 940
Trace map properties of variations of Fibonacci chains
T. Takemori, M. Inoue and H. Miyazaki 944

Section 10. Computer simulations

Reverse Monte Carlo: fact and fiction (*Invited paper*)
R.L. McGreevy 949
Ab initio Hellmann–Feynman molecular dynamics for liquid metals
G. Kresse and J. Hafner 956
Ab initio molecular dynamics study of liquid $Li_{12}Si_7$
G.A. de Wijs, G. Pastore, A. Selloni and W. van der Lugt 961
Low-frequency vibrations and relaxations in glasses
H.R. Schober, C. Oligschleger and B.B. Laird 965
A reverse Monte Carlo study of amorphous $Ti_{67}Ni_{33}$
E.W. Iparraguirre, J. Sietsma and B.J. Thijsse 969
Structure study of $Ni_{62}Nb_{38}$ metallic glass using reverse Monte Carlo simulation
L. Pusztai and E. Sváb 973
The structure of liquid Li–Si alloys
P.H.K. de Jong, P. Verkerk, W. van der Lugt and L.A. de Graaf 978
Simulation of vacancies in a Lennard-Jones glass
J.M. Delaye and Y. Limoge 982
Constant pressure molecular dynamics simulations of the crystal–smectic transition in systems of anisotropic soft-core molecules as a model for liquid crystals.
K.M. Aoki and F. Yonezawa 986

Concluding remarks (experimental)
F. Hensel 991
Concluding remarks (theoretical)
N.W. Ashcroft 994

Author index Parts I and II 999
Subject index Parts I and II 1011
